Industrial/Organizational Psychology
Master's Degree Program

Industrial/Organizational (I/O) Psychology is the scientific study of human behavior at work, and the application of that science to workplace challenges facing individuals, teams, and organizations. This continues to be a growing and dynamic field with multiple opportunities for employment.

Want to develop marketable workplace skills?
The Bureau of Labor Statistics projected that I/O Psychology was the fastest growing occupation, with an anticipated growth rate of 53% between 2014 and 2022. People with master’s degrees in I/O psychology programs are qualified for positions in consulting, private practice, government, and corporations.

Want to learn from the best?
The I/O psychology faculty members at TAMU are leaders in the field. They all publish internationally recognized research on work challenges and strategies, and collaborate with local businesses and agencies. In fact, two are in the top 2% of authors cited in popular I/O psychology textbooks.
